

### MAGNUM RANGE AND APPLICATION CHART

Magnum Plus comes in the following range of sizes, to match most light truck, medium truck and duplex tires.

LTP60	MTP250	DPP600
LTP100	MTP300	DPP700
LTP150	MTP400	DPP900
LTP200	MTP500	

Each packet contains an INSERT™ BAG that can be placed directly into the tire. We also provide a TPMS compatible valve core, plus a distinguishing valve cap.

#### APPLICATION CHART

To find the correct packet size of Magnum Plus to use for your tires, just find your tire size on the Application Chart and select the indicated packet of Magnum Plus.

For heavy-ply light truck tires (LT), you can use one size larger than indicated.

For smaller light truck tires not shown on the Application Chart, use LTP60.

For light truck and SUV tires 55 series or lower (marked \* on the Application Chart), you should use Magnum Plus in combination with a static electronic balance. For full details please refer to Technical Bulletin – Balancing low profile tires.

### WARRANTY

**M. & R. Tire Products Inc.** warrants that MAGNUM PLUS Tire Balancing Compound is manufactured to the highest specifications, and is non-hazardous and non-toxic. If MAGNUM PLUS Tire Balancing Compound fails to eliminate or reduce vibration caused by imbalance in a tire, when used as directed, a full refund for the product will be given to the purchaser, with proof of purchase. No other liability or warranty is offered, except where indicated by state or provincial laws.
